Last Updated By:	
Date Created:	March 28, 2026
Date Last Updated:	
Actors:	User
Description:	The user can submit queries through the online help system.
Trigger:	User selects help option
Preconditions:	User must enter query details
Post conditions:	• Query submitted successfully
Normal Flow:	• The User opens help section • The User enters query • The User submits request • System records query • Confirmation displayed
Alternative Flows:	None
Exceptions:	14.0 Empty query System displays error message
Includes:	None
Priority:	Low
Frequency of Use:	User
Business Rules:	Query field cannot be empty
Special Requirements:	Quick response system
Assumptions:	None
Notes and Issues:	None

Use Case ID:	15
Use Case Name:	Face scan verification
Created By:	Arnav
Last Updated By:	
Date Created:	March 28, 2026
Date Last Updated:	
Actors:	Pilgrim
Description:	The system verifies user identity using face scan during booking.
Trigger:	User proceeds with booking requiring verification
Preconditions:	Camera access must be enabled
Post conditions:	• Verification successful or failed
Normal Flow:	• The System activates camera • The User completes face scan • The System validates identity • System allows booking
Alternative Flows:	None
Exceptions:	15.0 Verification failure System denies booking
Includes:	Biometric system
Priority:	High
Frequency of Use:	Pilgrim
Business Rules:	Face must match stored data
Special Requirements:	High accuracy verification
Assumptions:	Camera is working properly
Notes and Issues:	None

Use Case ID:	16
Use Case Name:	Invalid personal details entry
Created By:	Arnav
Last Updated By:	
Date Created:	March 28, 2026
Date Last Updated:	
Actors:	Pilgrim
Description:	The system validates user details and prevents submission of invalid personal information.
Trigger:	User enters incorrect or incomplete details
Preconditions:	Registration or booking form is open
Post conditions:	• Error message displayed • Form submission is blocked
Normal Flow:	• The User enters personal details • The System validates input • Invalid fields are detected • System displays error message
Alternative Flows:	None
Exceptions:	16.0 Invalid input System highlights incorrect fields
Includes:	Validation system
Priority:	High
Frequency of Use:	Pilgrim
Business Rules:	All mandatory fields must be valid
Special Requirements:	Real-time validation
Assumptions:	None
Notes and Issues:	None

Use Case ID:	17
Use Case Name:	Booking confirmation generation
Created By:	Arnav
Last Updated By:	
Date Created:	March 28, 2026
Date Last Updated:	
Actors:	Pilgrim
Description:	The system generates a unique booking number after successful booking.
Trigger:	Booking process completed successfully
Preconditions:	Payment must be successful
Post conditions:	• Unique booking ID generated • Confirmation displayed
Normal Flow:	• The User completes booking • The System processes request • The System generates booking ID • Confirmation displayed
Alternative Flows:	None
Exceptions:	17.0 System error Booking ID not generated
Includes:	Booking system
Priority:	High
Frequency of Use:	Pilgrim
Business Rules:	Booking ID must be unique
Special Requirements:	Instant confirmation
Assumptions:	None
Notes and Issues:	None

Use Case ID:	18
Use Case Name:	Booking without availability
Created By:	Arnav
Last Updated By:	
Date Created:	March 28, 2026
Date Last Updated:	
Actors:	Pilgrim
Description:	The system prevents booking when no slots or rooms are available.
Trigger:	User tries to book unavailable slot
Preconditions:	No availability for selected option
Post conditions:	• Booking not allowed • Error message displayed
Normal Flow:	• The User selects date/slot • The System checks availability • No availability found • System displays message
Alternative Flows:	None
Exceptions:	18.0 No availability System shows "Not available"
Includes:	Availability system
Priority:	High
Frequency of Use:	Pilgrim
Business Rules:	Booking allowed only if available
Special Requirements:	Real-time availability check
Assumptions:	None
Notes and Issues:	None

Use Case ID:	19
Use Case Name:	Session timeout during booking
Created By:	Arnav
Last Updated By:	
Date Created:	March 28, 2026
Date Last Updated:	
Actors:	Pilgrim
Description:	The system handles session timeout if user is inactive during booking.
Trigger:	User remains inactive for long time
Preconditions:	Booking process is ongoing
Post conditions:	• Session expires • User redirected to login/home page
Normal Flow:	• The User starts booking • User becomes inactive • System detects timeout • System logs out user
Alternative Flows:	None
Exceptions:	19.0 Session expired System prompts user to login again
Includes:	Session management
Priority:	Medium
Frequency of Use:	Pilgrim
Business Rules:	Session timeout after inactivity
Special Requirements:	Security handling
Assumptions:	None
Notes and Issues:	None

VERIDEX Manual Test Cases

Template 1

Use Case ID	1
Use Case Name	User Signup with Email Verification
Created By	Arnav Aditya
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Unregistered User
Description	The user registers and receives a verification email valid for 1 hour to activate the account.
Trigger	User wants to create an account
Preconditions	User is not registered
Post Conditions	• Account created • Verification email sent
Normal Flow	• User opens signup page • Enters details • System sends verification email • User verifies within 1 hour
Alternative Flows	None
Exceptions	1.0 Verification link expired - user must request new link
Includes	Email Verification System
Priority	High
Frequency of Use	Medium
Business Rules	Account is inactive until email is verified
Special Requirements	Verification link valid for 1 hour
Assumptions	User provides valid email
Notes and Issues	None

Use Case ID	2
Use Case Name	User Login
Created By	Arnav Aditya
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Registered User
Description	Registered and verified user logs into the system.
Trigger	User wants to access system
Preconditions	User must be registered and email verified
Post Conditions	• Dashboard displayed
Normal Flow	• User opens login page • Enters credentials • System validates • Login successful
Alternative Flows	None
Exceptions	2.0 Invalid credentials error message
Includes	Authentication Module
Priority	High
Frequency of Use	High
Business Rules	Only verified users can login
Special Requirements	Secure authentication (JWT)
Assumptions	User remembers credentials
Notes and Issues	None

Use Case ID	3
Use Case Name	View Claims
Created By	Arnav Aditya
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Registered User, Unregistered User
Description	Users can view existing claims and their reliability status.
Trigger	User opens claims section
Preconditions	Claims must exist
Post Conditions	• Claims list displayed
Normal Flow	• User opens platform • Navigates to claims • System displays claims with reliability
Alternative Flows	None
Exceptions	3.0 No claims available
Includes	Claim Management
Priority	High
Frequency of Use	High
Business Rules	Viewing is allowed without login
Special Requirements	Fast data retrieval
Assumptions	System has stored claims
Notes and Issues	None

Use Case ID	4
Use Case Name	Submit Claim
Created By	Arnav Aditya
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Registered User
Description	Registered user submits a claim with supporting sources for evaluation.
Trigger	User wants to verify information
Preconditions	User must be logged in
Post Conditions	• Claim stored • Evaluation triggered
Normal Flow	• User opens submission page • Enters claim • Attaches sources • Submits
Alternative Flows	None
Exceptions	4.0 Missing data → error message
Includes	Source Management
Priority	High
Frequency of Use	High
Business Rules	Only registered users can submit claims
Special Requirements	Input validation
Assumptions	User provides valid sources
Notes and Issues	None

Use Case ID	5
Use Case Name	View Reliability Score
Created By	Arnav Aditya
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Registered User, Unregistered User
Description	Users view reliability score and confidence level of claims.
Trigger	User selects a claim
Preconditions	Claim must be evaluated
Post Conditions	• Score and status displayed
Normal Flow	• User opens claim • System fetches evaluation • Displays reliability score
Alternative Flows	None
Exceptions	5.0 Evaluation not available
Includes	Evaluation Engine
Priority	High
Frequency of Use	High
Business Rules	System shows deterministic score
Special Requirements	Fast response time
Assumptions	Claim is evaluated
Notes and Issues	None

Use Case ID	6
Use Case Name	Add Sources to Claim
Created By	Arnav Aditya
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Registered User
Description	The user adds supporting sources (URLs/documents) to a claim.
Trigger	User wants to strengthen a claim
Preconditions	User must be logged in Claim must exist
Post Conditions	• Sources attached to claim
Normal Flow	• User selects claim • Clicks add source • Uploads/enters source • System saves source
Alternative Flows	None
Exceptions	6.0 Invalid source format → error message
Includes	Source Management
Priority	High
Frequency of Use	Medium
Business Rules	Sources must be valid and accessible
Special Requirements	File/URL validation
Assumptions	Source is reachable
Notes and Issues	None

Use Case ID	7
Use Case Name	System Evaluates Claim
Created By	Arnav Aditya
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	System
Description	System evaluates claim reliability using deterministic rules.
Trigger	Claim submitted or updated
Preconditions	Claim and sources must exist
Post Conditions	• Reliability score generated • Confidence level assigned
Normal Flow	• System checks source count • Checks credibility • Checks freshness • Computes score
Alternative Flows	None
Exceptions	7.0 Evaluation failure
Includes	Evaluation Engine
Priority	High
Frequency of Use	High
Business Rules	Evaluation must be deterministic
Special Requirements	Explainable scoring
Assumptions	Sources are valid
Notes and Issues	None

Use Case ID	8
Use Case Name	View Claim Details
Created By	Arnav Aditya
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Registered User, Unregistered User
Description	Users view complete claim details including sources and evaluation.
Trigger	User selects a claim
Preconditions	Claim must exist
Post Conditions	• Claim details displayed
Normal Flow	• User clicks claim • System fetches data • Displays claim, sources, score
Alternative Flows	None
Exceptions	8.0 Claim not found
Includes	Claim Management
Priority	High
Frequency of Use	High
Business Rules	Data must be consistent
Special Requirements	Fast loading
Assumptions	Data exists in system
Notes and Issues	None

Use Case ID	9
Use Case Name	Participate in Discussion
Created By	Shravya Jain
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Registered User
Description	Registered users participate in claim-based discussions.
Trigger	User opens discussion section
Preconditions	User must be logged in
Post Conditions	• Comment stored • Discussion updated
Normal Flow	• User opens claim • Enters comment • Submits • System updates thread
Alternative Flows	None
Exceptions	9.0 Empty comment → error
Includes	Discussion Module
Priority	Medium
Frequency of Use	High
Business Rules	Only registered users can interact
Special Requirements	Content validation
Assumptions	User has access
Notes and Issues	None

Use Case ID	10
Use Case Name	Vote in Poll
Created By	Shravya Jain
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Registered User
Description	Registered user votes in polls related to claims.
Trigger	User selects poll option
Preconditions	User must be logged in
Post Conditions	• Vote recorded • Results updated
Normal Flow	• User opens poll • Selects option • Submits vote • System records vote
Alternative Flows	None
Exceptions	10.0 Multiple voting attempt → rejected
Includes	Discussion Module
Priority	Medium
Frequency of Use	Medium
Business Rules	One vote per user
Special Requirements	Prevent duplicate voting
Assumptions	Poll exists
Notes and Issues	None

Use Case ID	11
Use Case Name	Moderator Login
Created By	Shravya Jain
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Moderator
Description	Moderator logs into the system to access moderation dashboard.
Trigger	Moderator wants to access dashboard
Preconditions	Moderator account must exist
Post Conditions	• Moderator dashboard displayed
Normal Flow	• Moderator opens login page • Enters credentials • System validates • Access granted
Alternative Flows	None
Exceptions	11.0 Invalid credentials → error message
Includes	Authentication Module
Priority	High
Frequency of Use	High
Business Rules	Only moderators can access dashboard
Special Requirements	Role-based authentication
Assumptions	Moderator credentials are valid
Notes and Issues	None

Use Case ID	12
Use Case Name	Moderator Reviews Claim
Created By	Shravya Jain

Created By	Harshit Choudhary
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Moderator
Description	Moderator removes inappropriate or harmful content from discussions.
Trigger	Moderator detects violation
Preconditions	Moderator must be logged in
Post Conditions	• Content removed • Action logged
Normal Flow	• Moderator selects content • Chooses to delete • System removes content
Alternative Flows	None
Exceptions	15.0 Unauthorized attempt
Includes	Moderator Module
Priority	High
Frequency of Use	Medium
Business Rules	All actions must be logged
Special Requirements	Audit trail
Assumptions	Content violates rules
Notes and Issues	None

Use Case ID	16
Use Case Name	Re-evaluate Claim
Created By	Harshit Choudhary
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	System
Description	System re-evaluates a claim when new sources are added or updates occur.
Trigger	New source added / claim updated
Preconditions	Claim must exist
Post Conditions	• Updated reliability score generated
Normal Flow	• System detects update • Re-runs evaluation rules • Updates score
Alternative Flows	None
Exceptions	16.0 Evaluation failure
Includes	Evaluation Engine
Priority	High
Frequency of Use	Medium
Business Rules	Re-evaluation must be deterministic
Special Requirements	Consistent scoring
Assumptions	Sources updated
Notes and Issues	None

Use Case ID	17
Use Case Name	Logout
Created By	Harshit Choudhary
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Registered User, Moderator
Description	User or moderator logs out from the system securely.
Trigger	User clicks logout
Preconditions	User must be logged in
Post Conditions	• Session terminated • Redirect to login page
Normal Flow	• User clicks logout • System clears session • Redirects user
Alternative Flows	None
Exceptions	17.0 Session error
Includes	Authentication Module
Priority	High
Frequency of Use	High
Business Rules	Session must be securely terminated
Special Requirements	Token invalidation
Assumptions	Session is active
Notes and Issues	None

Use Case Name	Search Claims
Created By	Harshit Choudhary
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	Registered User, Unregistered User
Description	Users search for claims using keywords or filters.
Trigger	User enters search query
Preconditions	Claims must exist
Post Conditions	• Relevant claims displayed
Normal Flow	• User enters keyword • System processes query • Displays results
Alternative Flows	None
Exceptions	18.0 No results found
Includes	Claim Management
Priority	Medium
Frequency of Use	High
Business Rules	Search results must be relevant
Special Requirements	Fast response time
Assumptions	Data available
Notes and Issues	None

Use Case ID	19
Use Case Name	System Validates Input
Created By	Harshit Choudhary
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	System
Description	System validates user inputs during submission and interactions.
Trigger	User submits data
Preconditions	Input provided
Post Conditions	• Valid data accepted • Invalid data rejected
Normal Flow	• System checks input format • Validates data • Accepts or rejects
Alternative Flows	None
Exceptions	19.0 Invalid format → error message
Includes	Validation Module
Priority	High
Frequency of Use	High
Business Rules	All inputs must be validated
Special Requirements	Security validation
Assumptions	Input received
Notes and Issues	None

Use Case ID	20
Use Case Name	Maintain Audit Logs
Created By	Harshit Choudhary
Last Updated By	—
Date Created	March 28, 2026
Date Last Updated	—
Actors	System
Description	System maintains logs of all actions for transparency and auditability.
Trigger	Any system action occurs
Preconditions	System is active
Post Conditions	• Action recorded in logs
Normal Flow	• System detects action • Stores log entry • Updates audit records
Alternative Flows	None
Exceptions	20.0 Logging failure
Includes	Logging Module
Priority	High
Frequency of Use	High
Business Rules	All critical actions must be logged
Special Requirements	Secure log storage
Assumptions	System functioning properly
Notes and Issues	None

VERIDEX Manual Test Cases

Template 2

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
TC01_Veridex_User Signup (Valid)	Verify user signup with valid details and email verification	P0	Step1	Open signup page	—	Signup page should be displayed
			Step2	Enter valid name, email, and password	Valid user data	Data should be accepted
			Step3	Click on signup button	—	Verification email should be sent
			Step4	Open email and click verification link within 1 hour	Valid email link	Account should be successfully verified and activated
TC02_Veridex_User Signup (Invalid Email Format)	Verify signup with invalid email format	P0	Step1	Open signup page	—	Signup page should be displayed
			Step2	Enter name, invalid email, and password	Invalid email (user@)	System should reject input
			Step3	Click on signup button	—	Error message should be displayed for invalid email
TC03_Veridex_User Login (Valid)	Verify login with valid credentials	P0	Step1	Open login page	—	Login page should be displayed

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step2	Enter valid email and password	Valid credentials	System should accept input
			Step3	Click on login button	—	User dashboard should be displayed
TC04_Veridex_User Login (Invalid Password)	Verify login with incorrect password	P0	Step1	Open login page	—	Login page should be displayed
			Step2	Enter valid email and incorrect password	Invalid password	System should reject credentials
			Step3	Click on login button	—	Error message should be displayed
TC05_Veridex_User Login (Unverified Email)	Verify login attempt without email verification	P0	Step1	Open login page	—	Login page should be displayed
			Step2	Enter email and password (not verified)	Unverified account	System should reject login
			Step3	Click on login button	—	Message "Email not verified" should be displayed
TC06_Veridex_View Claims	Verify viewing claims without login	P1	Step1	Open platform homepage	—	Homepage should be displayed

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step2	Navigate to claims section	—	List of claims should be displayed
			Step3	Click on a claim	—	Claim details and reliability score should be displayed
TC07_Veridex_Submit Claim (Valid)	Verify claim submission with valid data	P0	Step1	Login to system	Valid credentials	User dashboard displayed
			Step2	Open claim submission page	—	Submission page displayed
			Step3	Enter claim and attach sources	Valid claim + sources	Data accepted
			Step4	Click submit	—	Claim should be stored and evaluation triggered
TC08_Veridex_Submit Claim (Missing Data)	Verify claim submission with missing fields	P0	Step1	Login to system	Valid credentials	Dashboard displayed
			Step2	Open claim submission page	—	Page displayed
			Step3	Submit without entering claim or sources	Empty input	System should reject submission

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step4	Click submit	—	Error message should be displayed
TC09_Veridex_View Claim Details	Verify viewing detailed claim info	P1	Step1	Open claims list	—	Claims displayed
			Step2	Select a claim	—	Claim details page opened
			Step3	View sources and score	—	Sources and reliability score displayed
TC10_Veridex_Add Source	Verify adding source to existing claim	P1	Step1	Login to system	Valid credentials	Dashboard displayed
			Step2	Open existing claim	—	Claim page displayed
			Step3	Add new source	Valid URL/document	Source accepted
			Step4	Submit source	—	Source should be added successfully
TC11_Veridex_Evaluate Claim	Verify system evaluates claim after submission	P0	Step1	Submit a claim with sources	Valid claim data	Claim should be stored

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step2	System triggers evaluation	—	Evaluation process starts
			Step3	System applies rules (source, freshness)	—	Reliability score should be generated
TC12_Veridex_View Reliability Score	Verify display of reliability score	P1	Step1	Open claim details	—	Claim page displayed
			Step2	View evaluation section	—	Reliability score shown
			Step3	Check confidence level	—	Confidence (High/Medium/Low) displayed
TC13_Veridex_Add Discussion Comment	Verify adding comment to discussion	P1	Step1	Login to system	Valid credentials	Dashboard displayed
			Step2	Open claim discussion	—	Discussion page shown
			Step3	Enter comment and submit	Valid comment	Comment should be added
TC14_Veridex_Add Empty Comment	Verify system rejects empty comment	P1	Step1	Login to system	Valid credentials	Dashboard displayed

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step2	Open discussion	—	Discussion page shown
			Step3	Submit empty comment	Empty input	System should reject and show error
TC15_Veridex_Vote in Poll	Verify voting functionality	P1	Step1	Login to system	Valid credentials	Dashboard displayed
			Step2	Open poll section in claim	—	Poll options displayed
			Step3	Select option and submit	Valid selection	Vote should be recorded
TC16_Veridex_Duplicate Vote Prevention	Verify user cannot vote multiple times	P1	Step1	Login and vote in poll	Valid user	Vote recorded
			Step2	Try voting again	Same user	System should reject duplicate vote
			Step3	Submit again	—	Error message should be displayed
TC17_Veridex_Moderator Login	Verify moderator login functionality	P0	Step1	Open login page	—	Login page displayed

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step2	Enter moderator credentials	Valid moderator credentials	Accepted
			Step3	Click login	—	Moderator dashboard displayed
TC18_Veridex_Moderator View Claims	Verify moderator can view all claims	P1	Step1	Login as moderator	Valid credentials	Dashboard displayed
			Step2	Open claims section	—	All claims displayed
			Step3	Select a claim	—	Claim details shown
TC19_Veridex_Moderator Approve Claim	Verify moderator approves claim	P0	Step1	Login as moderator	Valid credentials	Dashboard displayed
			Step2	Open claim	—	Claim details shown
			Step3	Click approve	—	Claim status updated to approved
TC20_Veridex_Moderator Reject Claim	Verify moderator rejects claim	P0	Step1	Login as moderator	Valid credentials	Dashboard displayed

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step2	Open claim	—	Claim details shown
			Step3	Click reject	—	Claim status updated to rejected
TC21_Veridex_Moderator Delete Comment	Verify moderator deletes inappropriate comment	P1	Step1	Login as moderator	Valid credentials	Dashboard displayed
			Step2	Open discussion	—	Comments displayed
			Step3	Delete comment	—	Comment removed successfully
TC22_Veridex_Search Claims	Verify search functionality	P1	Step1	Enter keyword in search bar	Valid keyword	Input accepted
			Step2	Click search	—	Relevant claims displayed
			Step3	Select result	—	Claim details displayed
TC23_Veridex_Logout	Verify logout functionality	P0	Step1	User clicks logout button	—	Logout initiated

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step2	System clears session	—	Session terminated
			Step3	Redirect to login page	—	Login page displayed
TC24_Veridex_Re-evaluate Claim	Verify system re-evaluates claim after new source added	P1	Step1	Add new source to claim	Valid source	Source added
			Step2	System triggers re-evaluation	—	Evaluation process starts
			Step3	System updates score	—	Updated reliability score displayed
TC25_Veridex_Invalid Source URL	Verify system rejects invalid source URL	P1	Step1	Open add source section	—	Page displayed
			Step2	Enter invalid URL	Invalid URL	System should reject input
			Step3	Submit source	—	Error message displayed
TC26_Veridex_Duplicate Claim Submission	Verify system handles duplicate claims	P1	Step1	Submit a claim	Valid claim	Claim stored

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step2	Submit same claim again	Same claim data	System detects duplicate
			Step3	Submit	—	Warning or rejection message displayed
TC27_Veridex_Input Validation	Verify system validates input fields	P0	Step1	Open submission form	—	Form displayed
			Step2	Enter invalid/empty data	Invalid input	System detects error
			Step3	Submit form	—	Error message displayed
TC28_Veridex_Access Without Login	Verify restricted actions without login	P0	Step1	Open claim submission page	—	Access attempt made
			Step2	Try to submit claim	—	System should restrict access
			Step3	Redirect	—	User redirected to login page
TC29_Veridex_Session Timeout	Verify session expires after inactivity	P1	Step1	Login to system	Valid credentials	Dashboard displayed

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step2	Stay inactive for long time	—	Session timeout triggered
			Step3	Perform action	—	User redirected to login
TC30_Veridex_Audit Log Creation	Verify system logs actions	P1	Step1	Perform action (submit claim)	Valid data	Action executed
			Step2	System records action	—	Log entry created
			Step3	Check logs	—	Action should be present in audit logs
TC31_Veridex_Signup (Existing Email)	Verify signup with already registered email	P0	Step1	Open signup page	—	Signup page displayed
			Step2	Enter existing email and details	Existing email	System detects duplicate
			Step3	Click signup	—	Error message "Email already exists" displayed
TC32_Veridex_Login (Empty Fields)	Verify login with empty input fields	P0	Step1	Open login page	—	Login page displayed

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step2	Leave fields empty	Empty input	System detects missing data
			Step3	Click login	—	Error message displayed
TC33_Veridex_Search (No Results)	Verify search with no matching results	P1	Step1	Enter random keyword	Invalid keyword	Input accepted
			Step2	Click search	—	No results found
			Step3	View message	—	Message "No claims found" displayed
TC34_Veridex_Add Source (Invalid File Type)	Verify rejection of unsupported file types	P1	Step1	Open add source page	—	Page displayed
			Step2	Upload unsupported file	.exe/.zip file	System rejects file
			Step3	Submit	—	Error message displayed
TC35_Veridex_Discussion Load	Verify discussion loads correctly	P1	Step1	Open claim discussion	—	Discussion page displayed

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step2	Load comments	—	Comments displayed
			Step3	Scroll/view thread	—	Full thread loads without error
TC36_Veridex_Modify Claim (Unauthorized)	Verify user cannot modify others' claims	P0	Step1	Login as user	Valid credentials	Dashboard displayed
			Step2	Open another user's claim	—	Claim displayed
			Step3	Try editing claim	—	Access denied message displayed
TC37_Veridex_System Stability	Verify system handles multiple actions smoothly	P1	Step1	Perform multiple actions (login, submit, view)	Valid actions	System processes requests
			Step2	Monitor response	—	No crash or delay
			Step3	Continue usage	—	System remains stable
TC38_Veridex_Email Verification Expiry	Verify email verification link expires after 1 hour	P0	Step1	Complete signup process	Valid user data	Verification email sent

TEST CASE NAME	TEST CASE DESCRIPTION	P	STEP NAME	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
			Step2	Wait for more than 1 hour	—	Link should expire
			Step3	Click verification link	Expired link	System shows "Link expired" message
TC39_Veridex_Refresh Claim Page	Verify claim page refresh maintains data consistency	P1	Step1	Open claim details page	—	Claim displayed
			Step2	Refresh page	—	Page reloads
			Step3	Verify data	—	Same claim details and score displayed
TC40_Veridex_Concurrent Users	Verify system handles multiple users simultaneously	P1	Step1	Multiple users login	Valid credentials	Users logged in
			Step2	Perform actions simultaneously	Multiple inputs	System processes all requests
			Step3	Monitor performance	—	No data conflict or crash
